

Introduction

L.TEQ Ltd

L.TEQ was founded in 1984 and has grown to become one of the leading suppliers of communications equipment for Satellite and Terrestrial transmission. Based in the UK we provide a comprehensive range of communications products, many from our extensive stockholding.

Buying from L.TEQ provides our customers with access to technical support and applications advice based upon 19 years practical experience in advanced communications products and systems.

L.TEQ's technical support personnel are factory trained and understand the practical issues facing our customers in today's commercially sensitive market where value for money and whole life costs are of paramount importance.

L.TEQ's reputation is based upon providing a comprehensive service from initial applications advice through complete product selection to after sales care and support. Our fully equipped microwave and RF laboratory ensures that all products provided by L.TEQ have been tested to meet published specifications and regulatory requirements.

We understand that many customers today do not have the luxury of time to research the latest products and understand their benefits in modern communications systems, therefore working with L.TEQ our customers immediately gain access to extensive applications knowledge based upon thousands of deployed products around the world.

Our plan to help you, the customer, is simple:

- Provide comprehensive product selection services
- Offer technical and System support for all products
- Offer a complete after sales service and support
- Provide competitive product rapidly often from UK based stock.
- Respond quickly to each and every customer enquiry

We are confident that whatever your requirement L.TEQ can provide a solution. With access to many of the leading communications equipment manufacturers we are able to provide a true 'one stop shop' unrivaled by any other company in the communications industry.
