

Product Description

Part number : SA1272

Description

Lightning protection kit for ground mounted ALPHA VSAT terminal

Details

A kit of parts to protect a ground mounted L.TEQ ALPHA VSAT terminal

- * 2 x sets of earth rods
- * 1 x air terminal
- * Metalwork clamps
- * Circular conductor

The kit includes adapters to enable a ground mounted antenna to be bonded to an earth rod. A second earth rod is provided to allow the IFL cables to be bonded to ground prior to entry into a building.

Disclaimer: The design of the lightning protection system, must comply with local conditions and regulations. Since every location is different, the kit described above may not provide adequate protection in all circumstances.
