

Product Description

Part number : SA1274

Description

Lightning protection kit for VSAT IFL (RS485 M&C)

Details

A kit of parts to protect the following cables used between a L.TEQ ALPHA VSAT terminal and the indoor equipment:

- * Transmit IF coaxial cable
- * Receive IF coaxial cable
- * 220v power source
- * RS485 Monitor and control cable

Kit includes protection devices for both ends of each cable except for the 220v power source which only has protection at the antenna.

Kit includes all grounding wires and mounting brackets.

Note: The grounding common point must be connected to a suitable low impedance earthing point
