

Product Description

Part number : SA1283

Description

Cable kit for VSAT (70MHz transmit, L-Band receive)

Details

A kit of signal cables used between a L.TEQ ALPHA VSAT terminal and the indoor equipment:

- * Transmit IF RG214 coaxial cable from N-Type bulkhead panel
- * Transmit IF RG223 coaxial cable between N-Type bulkhead panel and modulator (1 metre length).
- * Receive IF RG6 coaxial cable terminated in F-Type connectors
- * Monitor and control cable (using 4 wire RS485 for the monitor and control function).
- * Bulkhead termination panel
- * Installation materials

Note:

Specify length of outdoor cables at time of ordering.

Standard lengths are 33, 66 and 100 metres
